## **TRAPPIST ALES**

The criteria for being labeled as such are the following:*

*The beer must be brewed within the walls of a Trappist monastery, either by the monks themselves or under their supervision.*

*The brewery must be of secondary importance within the monastery and it should witness to the business practices proper to a monastic way of life*

*The brewery is not intended to be a profit-making venture. The income covers the living expenses of the monks and the maintenance of the buildings and grounds. Whatever remains is donated to charity for social work and to help persons in need.*

*Trappist breweries are constantly monitored to assure the irreproachable quality of their beers.*

*This association has a legal standing, and its logo gives the consumer some information and guarantees about the product.*

- JOLLY PUMPKIN BIÈRE DE MARS 750ML *AMERICAN***.....30  
7% ABV, Farmhouse ale. A sustaining beer that is brewed to comfort in the gusty ides of March and welcome in a wealth of warmer weather. Lots of brewers use oak barrels to age their beers these days, but Jolly Pumpkin actually ferments in the wood, and the result is beer of extraordinary complexity and earthiness. Despite the risks of fermenting in oak, however, these beers are nicely balanced and drinkable, and don't seem to suffer from the oxidation and off-flavors so common in aged beer. ## **LAMBIC**

*Traditional beer brewed in the Pajottenland region of Belgium, near Bruxelles, fermented by leaving the wort exposed to the atmosphere and wild yeast. Fermentation only takes place from October to May in order to reduce contamination. Part of the reason for the complexity of these brews is due to the aging process, which usually includes blending one, two and three year old beers.*

## **LAMBIC CONT.**

### **CANTILLON IRIS 750ML *BELGIAN (NEW!!)*.....60**

5% ABV, The Cantillon brewery is closely linked to Brussels, a city which has the iris as its symbol. As the name indicates, the "marsh iris" is a plant growing in humid areas. The historical center of Brussels is built on swamps where this flower used to grow abundantly. In 1998, the Brussels Museum of the Gueuze celebrated its 20th anniversary. The Cantillon brewery decided to make a new spontaneous fermentation beer for this occasion, named after this symbolic flower. The Iris, which is only made with malt of the pale ale type (giving a more amber colour to the beer) conserves the typical flavour of the spontaneous fermentation, the complex aromas and the vinous taste. After two years in the barrel, the Iris undergoes a second fresh hopping two weeks before the bottling. A linen bag, filled with hops, is soaked in the beer for two weeks. This technique, called "cold hopping", gives the beer a more intense savour and makes the smell and the taste more bitter.

### **CANTILLON GUEUZE 375/750 ML *BELGIAN*..... 30/44**

5% ABV, In the 18th century, a Benedictine monk, dom Pérignon, discovers the champagne method by blending different non sparkling white wines. One century later, a Brabant brewer blends different lambics and brings about a spontaneous fermentation in the bottle. The Gueuze is born. Up to the 19th century, the people from Brussels and Brabant mostly drank two beers, Lambic and Faro. The glass bottle and the discovery of Dom Perignon will bring about a revolution in the small world of the Brussels brewers. The Gueuze became the icon of the Brussels beers. Lambic, which is the base for the making of Gueuze, is a spontaneous fermentation beer. All beers made with Lambic are naturally sour, but some will be more sour, more bitter or "softer" than the others. The Gueuze is the result of a well-considered blending of Lambics of different ages and with different tastes.

### **CUVÉE DE RANKE 750ML *BELGIAN*.....35**

7% ABV, Cuvee is an ale of mixed origin like many Belgian breweries used to make. The production process is nearly the same as for the Kriek, the difference being that no cherries are added. It's a naturally acidified ale in which we try to reach the perfect balance between sweet and sour. This amber-coloured ale contains 7% vol. Alc. and can age really nice.

### **DRIE FONTENEIN KRIEK 375ML *BELGIAN*.....25**

6% ABV, Oude Kriek is produced by ripening cherries (both the fruit and the seeds) in young Lambic. This process takes between 6 to 8 months and after bottling the beer matures for at least four months in a warm room where the spontaneous fermentation occurs in the bottle. The head of Oude Kriek is very sensitive to the concentration of oil containing the cherry pits and can vary from one year to the next. No flavor, sweeteners, or dyes are added which makes this beer is very natural and most thirst-quenching.

## **LAMBIC CONT.**

MIKKELLER SPONTANOBLE 375ML *DANISH* .....30  
5.5% ABV, The beer that first enters an oak barrel during the formation of Mikkeller's Lambic style ales is usually the same. Had no fruit been added to the barrel you would get something that resembles a Gueuze. This batch of spontaneously fermented ales is aged in sauternes barrels, picking up some of that wonderful "Noble Rot" character.

HANSEN'S GUEUZE 375ML *BELGIAN*.....22  
6% ABV, hazy gold color and an aroma of wet wool, preserved lemons, vanilla, and earth. The palate is sharply tangy and dry, opening up to a marvelously complex display of citrus and damp earth in the center. The finish is miles long and juicily acidic, with a final flourish of fruit.

ROSEE D'HIBISCUS 330ML *CANADA* .....12  
5.9% ABV, The Rosée d'Hibiscus is a soft spoken wheat beer. The rose colour comes from the hibiscus flowers added during the brewing process. The aromas and flavour of this tropical flower are very prominent in the beer, giving it a slight acidity and a very agreeable fragrance. It is the perfect thirst quencher on a hot summer day.

BAIRD CARPENTER'S MIKAN 633ml.....22  
The mikans used in this brew are fresh, succulent, and local, harvested by the hand of our carpenter friend. Both peel shavings and juice are added to the brew at different stages of production. ## **PALE ALES & MISC.**

**ALESMITH X EXTRA PALE ALE 650ML AMERICAN** ..... 14  
5.25% ABV, 35 IBU, This refreshing, light-golden Extra Pale Ale embodies drinkability. AleSmith X pushes the limits by offering a level of flavor not often found in this classic style. **LOCAL OPTION MORNING WOOD 500ML AMERICAN**..... 17  
7.1% ABV, Local Option Morning Wood is an oak-aged coffee ale developed and brewed by Local Option Bierwerker. Fresh American oak used during the aging process and Dark Matter’s El Salvador San Jose pulp-natural coffee aromatically drive the beer; while remaining subtle components of the beers’ complete flavor profile. The amber colored, medium-bodied, and extraordinarily well-balanced ale was first unveiled at the Festival of Wood and Barrel Aged Beers in November 2011. Morning Wood’s taste is delicate and should be appreciated by beer drinkers of all palates.

## **CIDER**

*A fermented drink made from fruit juice, usually apples or pears. Can be still, sparkling, dry, or sweet.*

**ASPALL DRY CYDER 330ML AMERICAN**..... 9  
6.8% ABV, Aspall Suffolk Cyder is made from a blend of different "base" cyders. These cyders are all fermented using the same basic technique. All Aspall Suffolk Cyder is lightly sparkling. This has the effect of lifting the aroma and flavour, so complimenting the experience, ripe apples balloon in the aroma, with rustic barnyard scents giving the bouquet a deep earthiness.

**ASPALL PERRONELLE’S BLUSH CYDER 500ML ENGLISH**..... 15  
5.4% ABV, The color is deep blush suggestive of dark summer fruit, with a rich appearance due to the viscosity of the Creme de Mure. There is a subtle blackberry aroma with a hint of traditional apple. Deceptively smooth with a silky but refreshing palate, Blush offers a perfect blend of sweetness and acidity. It has a lovely mouthfeel and a lingering aftertaste of berries.

## **SAISON**

*French for season, these "farmhouse" ales were once the drink of choice for farmers in Wallonia, the French speaking region of Belgium, due to their low alcohol content and thirst quenching quality. Once a nearly extinct style of beer, unique renditions of Saisons have been popping up throughout the brewing world over the past few years.*

GRASSROOTS/ANCHORAGE ARCTIC SOIREE 750ML *AMERICAN*.....30  
6% ABV, Grassroots Brewing is a subsidiary of Hill Farmstead Brewery, VT. Brewed in collaboration with Anchorage Brewing in Alaska. AU BARON CUVÉE DES JONQUILLES 750ml .....28  
7% ABV, French farmhouse ale, "jonquilles" is the French word for daffodils, and the name undoubtedly refers to the lush garden surroundings of the Baron restaurant and its tiny Bailleux brewery, where the beer is made in very small batches. Cuvée Des Jonquilles is almost impossible to find even in France, and intrepid beer-lovers usually have to make their way to the restaurant to get it. The Baron and Bailleux brewery are situated just over the border with Belgium, and are themselves nearly impossible to find, but very much worth the effort. All you need to know is that Cuvée des Jonquilles has long been considered one of the very best beers of France.

## **SAISON CONT.**

### **FANTOME SAISON 750ML *BELGIAN*.....30**

8% ABV, This is a tremendously delicious, textural, and fizzy country ale, bright gold colour, citric and sour, reminiscent of a good champagne or lambic but in a class all its own. There are many drinkers out there who believe this is the "Nectar of the Gods." Certainly no other brewer makes beer like this, in Belgium or anywhere. How many beers of 8% plus offer such fresh fruitiness? A solid Belgian saison beer at its base, with an unusual overlay of fruitiness.

### **FANTOME BOO! 750ML *BELGIAN* .....30**

## **IPA**

*India Pale Ales get their name and flavor profile from their historic travels from England to India. In order to survive the journey, these beers were loaded with hops, a natural preservative. Hops also have a reputation for making beer bitter. Love for this cannabinoid has led to the breeding of many new strains of hops, specifically chosen for flavor, aroma, and bittering level. The bitterness of a beer is measured in International Bitterness Units (IBUs).*

### **KNEE DEEP SIMTRA 750ML *AMERICAN*.....25**

10.1% ABV, Simtra Triple IPA delivers a punch in the face with its very danky hop aroma derived from Simcoe and Citra hops. You wanted more hops you got them. ### **KNEE DEEP HOPTOLOGIST 750ML *AMERICAN*.....25**

## **IPA CONT.**

- DIEU DU CIEL PENOMBRE 341ML *CANIDIAN*.....13**  
6% ABV, Black IPA. Again, an American invention. This style was born at the "Vermont pub and brewery" around 1997. It could be said that this beer tries to be a hybrid between a regular IPA and a porter. The Pénombre presents a light body and well expressed toffee taste. The whole is however dominated by an evident bitterness, which stays always in balance with the other tastes found in the beer. In the after taste, the bitterness and hop flavours grow slowly but surely, sip after sip.
- MIKKELLER OPEN WINDOWS OPEN HILLS 750ml .....30**  
8% ABV, Pale ale brewed with mango and passion fruit in honor of Norwegian pop group TIGER BABY. Aggressively hopped and balanced with bright tropical fruit and lush malty resin mouth feel.
- DE LA SENNE MANNEKEN-PENN 330ML *BELGIAN*.....12**  
7.5% ABV, Belgo-American Dubbel whose name and label art were inspired by Philadelphia's famed William Penn and brussels' landmark. Manneken-Penn was made with oats, molasses and a combination of American and European hops. Cloudy brown body with very tall lasting head. Flavor begins sweet with molasses, hops and sweet caramel. A lasting bitter finish.
- BINK HOP VERDOMME 330ML *BELGUM*.....12**  
7% ABV, This beer is a bright, copper-gold coloring that is slightly hazed, with a slow carbonation bubbling throughout. Filmy, sparse, white surface coating of head. Aromas of tropical fruit, melon, spearmint, bubblegum, and a cluster of spices, including clove, jasmine, and nutmeg.. Flavors are a very tangy blast of tropical fruits, including melon, pineapple, mango, and grapefruit quickly following.
- MIKKELLER NELSON SAUVIN BRUT 750ML *DANISH*.....45**  
9% ABV, Brewed by base malt and mashing and fermentation with added enzymes to achieve as high fermentability as possible. For both bitter, taste and aroma hops are used the New Zealand hop variety 'Nelson Sauvín' which is named after its grape characters that bring memories to the New Zealand white wine grape Sauvignon Blanc. The yeast is used both champagne and brettanomyces and because the enzymes are beers fermented very far down, and thus the end result is a very dry beer. After fermentation the beer has been 5 months in casks of white wine from Austria Weingut Kollwentz and gained additional character. Absolutely stunning and one of the most complex, balanced, and intriguing beers from Mikkeller.
